

**Anu Solar Power Pvt. Ltd.**

Anu Solar Power has been around for nearly three decades, and has had extensive and intensive exposure to the growth and development of the renewable energy sector in the country. The organizations founding fathers share a deep commitment to develop world class renewable energy products for the Indian masses, at affordable rates. One of the few companies with a significant and highly accomplished R & D team, Anu Solar Power has developed and customized a host of products, from solar water heaters, LED lights and solar inverters for the Indian scenario.

**The Solar Advantage**

- Solar energy is inexhaustible and a renewable source of energy.
- It replaces the usage of conventional energy sources like oil, gases etc.
- The energy from the sun is virtually free.
- Most of the solar energy equipment are stand alone, there by not requiring the support of power of gas grid.
- Solar equipment required very little maintenance (they have no moving parts) and they last a long time.
- Solar powered equipment are very easy to install and does not require frequent maintenance.
- Usage of solar energy helps mankind to escape from the dangers of global warming, health hazards due to the usage of fossil fuels etc.
- Payback period is as short as 2½ years.
